

RADAR™: Solving the Critical Challenge of DDoS Security

The Problem: All DDoS protection is vulnerable.

DDoS protection misconfigurations lead to DDoS vulnerabilities, which lead to damaging DDoS attacks.

DDoS protection will only automatically block attacks specifically configured per production environments deployed. All other attacks will cause damaging SLA's time-to-mitigation and emergency response time.

The Solution: MazeBolt RADAR™

The only continuous non-disruptive DDoS testing solution that provides full visibility into online services' DDoS protection vulnerabilities.

Proactively Identifying & enabling the elimination of all DDoS vulnerabilities in your protections.

Allowing security teams to patch all vulnerabilities before a damaging attack.

Key Benefits

- ✓ **Avoid a damaging DDoS attack**
Using RADAR is the only way to know if your DDoS protection is working.
- ✓ **Maximize protection ROI**
Measure your DDoS protection's effectiveness while gaining cyber-insurance premium reductions.
- ✓ **Complete DDoS resilience**
Through continuous identification and elimination of vulnerabilities.
- ✓ **Zero operational downtime**
RADAR simulates DDoS attacks on online services without disruption.
- ✓ **OSI Layers 3, 4, and 7 validated**
With over 150 attack vectors simulated.

RADAR™:

A Critical Breakthrough in DDoS Security

RADAR is a paradigm shift in DDoS protection: from a reactionary response during a damaging attack to preventative remediation before the damage, maintaining automated protection.

While DDoS protection alone is vulnerable, RADAR is the only way to identify and remediate DDoS vulnerabilities, maintaining continuous automated DDoS protection.

With prioritized remediation and continuous validation, RADAR empowers stakeholders and security teams to adopt the new transformative approach of DDoS resilience: preventative, proactive, automated protection.

DDoS Protection WITHOUT RADAR

Vulnerable:
Manual mitigation = damaging downtime

DDoS Protection WITH RADAR

Protected:
Automatically blocked = no downtime

MazeBolt is pioneering a new standard in DDoS security. RADAR™, an industry first patented solution, empowers organizations to identify and remediate vulnerabilities in every layer of DDoS protection. Global enterprises, including financial services, insurance, gaming, and high-security government environments, rely on MazeBolt to prevent damaging DDoS attacks.
