

MazeBolt RADAR™

vs.

Traditional DDoS Testing

MazeBolt RADAR is a DDoS Vulnerability Management solution that uses thousands of attack simulations to identify and help eliminate DDoS vulnerabilities – proactively, continuously, and with zero disruption to business operations.

	MazeBolt RADAR	Traditional DDoS Testing
Free POC	✓	✗
100% attack surface visibility	✓	✗
No service downtime	✓	✗
Continuous testing	✓	✗
>10,000 simulations	✓	✗
Validation of remediation	✓	✗
Identifies points of vulnerability	✓	✗
Covers all security layers	✓	✗
Reduces time-to-mitigation	✓	✗
Optimizes ROI	✓	✗
